

Yet another **INFLATION MILESTONE** from IBA Inc.

Results and observations from dairies using the Vision Inflation System:

- Improved teat end condition
- Significantly reduced liner slips
- Helped reduce and maintain low somatic cell counts
- Reduced machine-on-time even with increased milk production
- Improved cow comfort during milking
- Clinical cases of mastitis appear to be decreased on dairies where they were closely observed and recorded

**Successfully used on
many of the top dairies
in the United States**

U.S. Patent #7,882,803
U.S. Trademark #2818691
