

WELCOME TO

Agri-King is an animal nutrition company committed to the success and profitability of livestock producers worldwide.

ABOUT US

Agri-King believes that capturing the nutritional value in feeds is the key to profit. Our main purpose is to improve your herd's health through highly fortified and properly balanced diets while increasing your bottom line. We're certified by Safe Feed/Safe Food (SF/SF) and Feed Materials Assurance Scheme (FEMAS is an IFIS-compliant standard).

OUR HISTORY

In 1968, Del Curley developed an idea based on the success farmers were experiencing by first testing their soil and then fertilizing accordingly. He thought this concept could also be used to test feedstuffs and then supplement the nutrients that livestock rations were lacking. Agri-King became the first to test feedstuffs and balance feeding rations using highly fortified products. Through the years, Agri-King continues to lead the industry with innovative ideas along with development of superior products.

Agri-King has 50 years of experience in research and feeding enzymes and microbial products to livestock operations. Client records show increases in feed efficiency,

"CAPTURING THE NUTRITIONAL VALUE IN FEEDS IS THE KEY TO PROFIT."

WHAT WE DO AT

From taking on-the-farm samples to testing in our state-of-the-art laboratory, Agri-King stands by its field representatives and clients helping them make the best, informed decisions for their operations.

CUSTOM-BUILT RATIONS

Agri-King balances every livestock feeding ration to fit the clients' needs and to help them maximize their herd's performance and give them the best possible nutrition. Putting custom rations together takes highly trained and educated nutritional consultants, and Agri-King remains the recognized leader in service and cutting-edge technology. We are the expert animal feed supplier for beef cattle, dairy cattle, swine and poultry.

FORAGE TREATMENT

Silo-King® is Agri-King's multi-purpose forage and grain treatment program for use on corn silage, haylage, large and small square bales, round bales, balage, high moisture cracked grains and small grain silages. Silo-King® has been field proven, laboratory tested and university-researched and is highly-ranked in national marketing surveys of dairy producers.

LAB SERVICES

Agri-King established ANALAB in 1972 to test feedstuff samples to personalize its livestock feeding rations. ANALAB is a premier state-of-the-art laboratory and research facility operated by an innovative, pioneering team of professional chemists and microbiologists who interpret analytic data and provide solutions through testing. Each year, the lab processes over 60,000 samples from the United States and around the world.

PERSONAL SERVICE

Agri-King strives to provide the best service to each of its clients. Our field staff regularly make in-person visits to ensure the clients' products are working to expectation and troubleshoot problems that may arise. In addition, our nutrition staff is on call throughout the day to answer questions clients may have.
