

**We have one clear
goal: helping dairy
and beef producers
raise healthy and
resilient herds.**

**Diamond V™ has evolved—
from a postbiotic pioneer to
your micronutrition solutions
partner.**

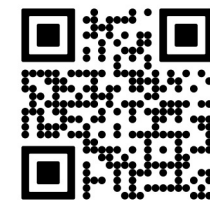

Backed by global expertise in the interplay between nutrition and the ruminant microbiome, we help producers and nutritionists solve real challenges—from feed consistency and forage quality to herd health and heat stress.

Our strength lies in our people, our proven portfolio, and our practical, personalized support—driving results where it matters most.

Proven Solutions
backed by 80+ years
of innovation

On-Farm Expertise
that delivers measurable
impact

Trusted Partnerships
built on shared success

Core Offerings

Postbiotics: Our postbiotic technologies are backed by decades of microbial science, delivering consistent results in immunity, performance, and rumen health.

Inoculants: Our silage inoculants help preserve feed quality from harvest to feed out—supporting ration consistency and animal performance.

Mycotoxin: From swift detection to precise adjustments, our team helps strategize and address the threat of mycotoxins in rations, helping ensure herd health and performance.

Where Insight Meets Impact

We turn micronutrition into macro impact—supporting healthier herds, more productive farms, and a more secure future.
