IMPROVED COW HEALTH

Cow Brush

ROBUST & DURABLE

IMPROVE COW HEALTH

The BouMatic Cow Brush will improve your cow's health and well-being and consequently her productivity. The BouMatic Cow Brush is designed and engineered in such a way, that parasites and other vermin are brushed away from the places the cow isn't able to reach herself.

Provide your cows with a treat that improves their health.

- **High quality nylon brush** – Provides a comfortable scratch to the cow with the right length and firmness of bristles to stimulate blood circulation
- **Energy saving** – Automatic on/off control starts the brush rotating on demand and stops it shortly after use
- **Steady and even brushing** – After every 200 starts, the brush reverses the direction of rotation to ensure an even wear and a longer life for the bristles
- **Improves cow health** – Prevents cows from hurting themselves by scratching on any available surface, provides a safe way for cows to scratch and get rid of parasites
- **Improves milk production** – Promoting blood circulation can result in an increase in milk production and has been shown to reduce cases of clinical mastitis
- **Durable & robust** – Single brushes with stainless steel core housed in a closed and solidly protected cabinet, heavy duty bearings located at both sides of the rotation shaft
- **Safe** – Built-in inductive sensor that turns the gear motor off when the brushes are blocked for more than 0.6 seconds
