

Profitability Through Immunity, Health & Performance

Next Generation Dairy Technology

Optimized gut health and immune strength translates into healthy cows performing to their genetic potential. **NutriTek®** can help dairy animals with **overall health and wellness** through efficient use of nutrients for **greater profitability** — the goal of every dairy.

Healthy Animals Perform Better

Dairy animals are exposed to a wide range of potential stressors. Even though we try to minimize challenges and variation, those animals unable withstand the challenge are compromised in their health and performance.

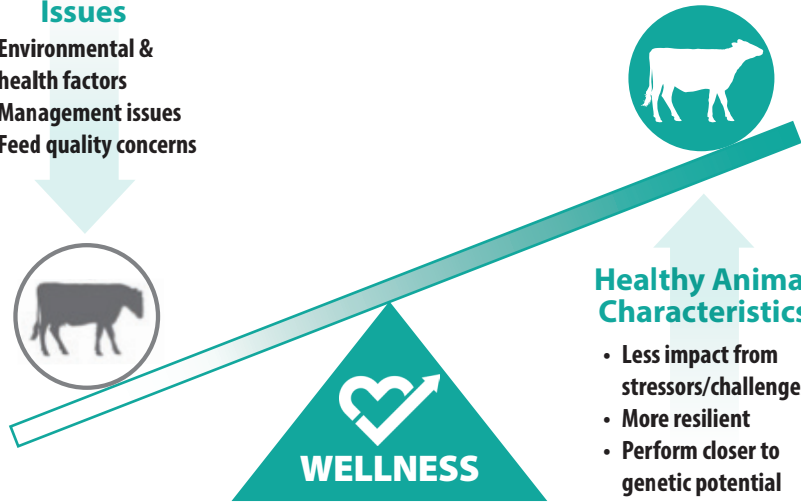

Poor Health Issues

- Environmental & health factors
- Management issues
- Feed quality concerns

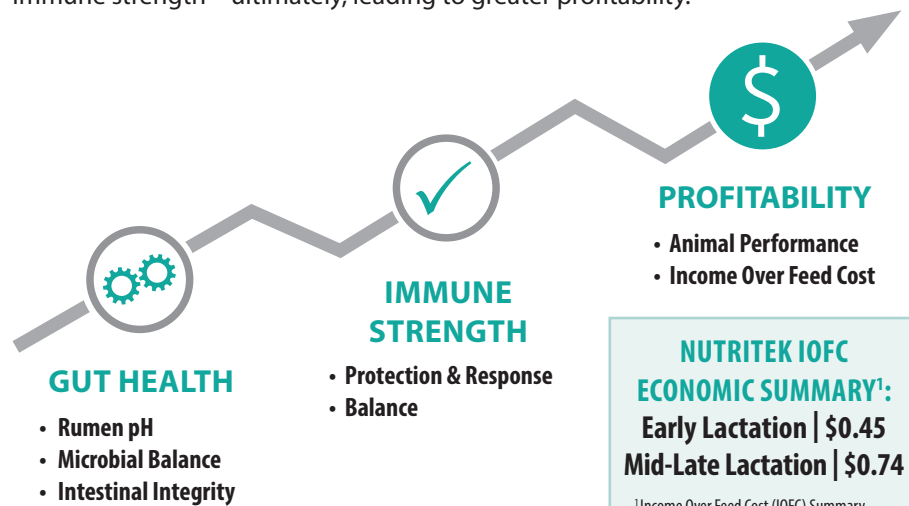

Healthy Animal Characteristics

- Less impact from stressors/challenges
- More resilient
- Perform closer to genetic potential

NutriTek Helps Support Health & Wellness

Research shows that NutriTek helps support gut health and maintain immune strength – ultimately, leading to greater profitability.

NUTRITEK IOFC ECONOMIC SUMMARY¹:

Early Lactation | \$0.45

Mid-Late Lactation | \$0.74

¹Income Over Feed Cost (IOFC) Summary does not account for other benefits, such as: Health (mammary, pneumonia), SCC, Milk Components, Reproduction, BCS

Diamond V Research: Innovation Leads to NutriTek

1 APPLIED Production Benefits of XPC

Nutritional principles from the global success of Original XP™ and Original XPC®.

NutriTek was conceived and developed from more than 75 years of time-tested scientific principles, along with Diamond V human-product innovation, and ultimately, performance of the technology in dairy animals.

2 LEVERAGED Immune Strength of EpiCor®

Scientific knowledge of immune response from the research and development of Diamond V's human product EpiCor®.

3 UNLOCKED Next Generation for Dairy

New features and benefits for dairy profitability.
