Magnum™ 450TL

THE LINER WITH
TURBO ACTION

The new shaped liner design with BouMatic's patented mouthpiece results in maximum milkability. Consistent, even milk-out from quarter to quarter, milking after milking.

The Turbo 450TL liner hugs teats just right preventing excess stress on the teat for a healthier overall udder and happier cow.

- **Round shoulder** – Low mouthpiece vacuum - less mouthpiece congestion
- **Transitional shape** – “Hugs” the teat rather than pinching the teat for comfort, results in less squawks and unit kick-offs
- **Operates at wider range of vacuum** – Allows dairies to achieve conservative and progressive goals for milk harvest
- **Tapered barrel** – For optimal teat massage and faster milk-out which provides more throughput
- **Transitional wall thickness** – Lower placement of liner touchpoint is ideal for teat placement allows a healthy teat end is the first defense against bacteria
- **Specially formulated rubber** – Increases the overall life of the liner to 2,400 milkings
