Timet®

RUMINANT

ENG

vetagro.com

VETAGRO®
LIKE NO ONE ELSE®

Timet® is a rumen by-pass source of methionine for ruminant species.

Plus

Benefits

- Improved animal performance and nitrogen efficiency
- Enhanced reproductive performance
- Increased sustainability

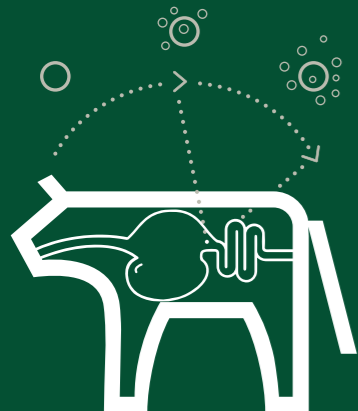

Features

- Scientifically proven mode of action
- Ideal for amino acid balancing: can be used with **Relys®50**, as a source of lysine
- Suitable for on-farm or feedmill application

Microencapsulation technology

- Proven rumen protection
- High intestinal bioavailability
- Stability during pelleting and mechanical stress

As free amino acids are strongly degraded at ruminal level, **Timet®** methionine is microencapsulated in a lipid matrix to be highly available at the intestinal level.

Certain statements may not apply in all geographical regions. Product labeling and associated claims may vary based on specific government requirements.

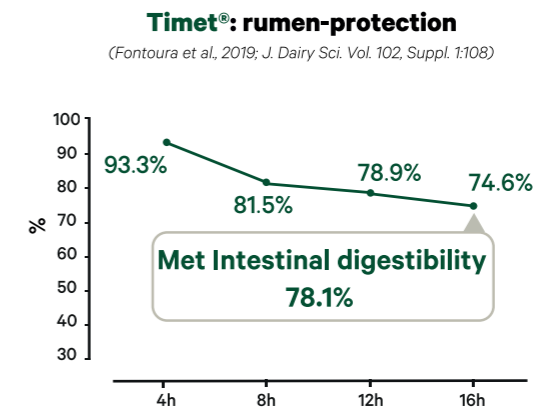

Timet®

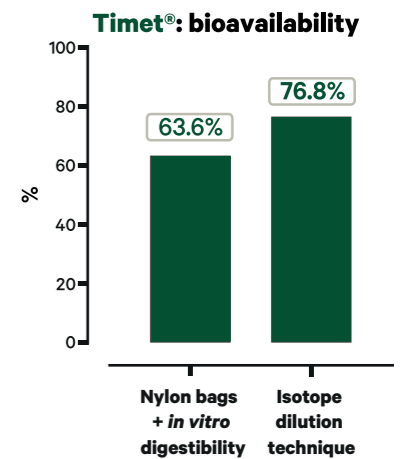

Highly bioavailable methionine for animal performance.

Protection of methionine from rumen degradation with high intestinal bioavailability

Values of **Timet®** rumen-protection using the nylon bag technique and *in vitro* intestinal digestibility at 16 hours

Values of **Timet®** bioavailability using two different techniques

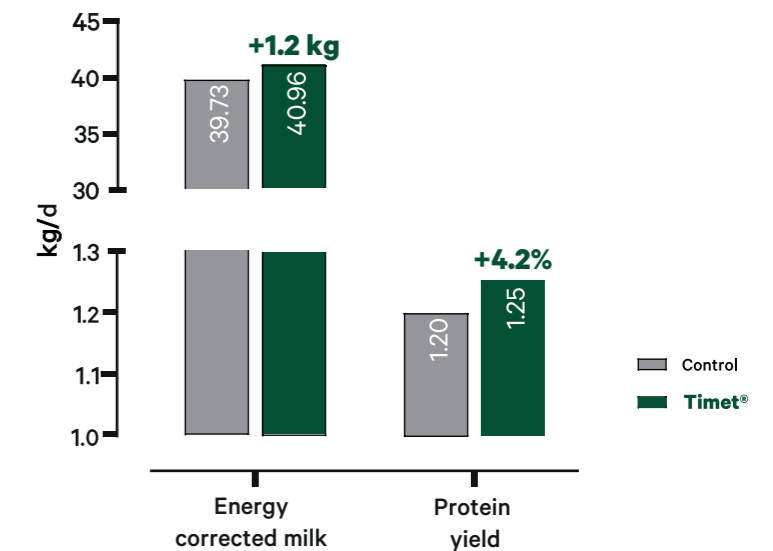

Improved milk yield and quality

Profitability

Timet®: improvement on milk production
