

SPECTRUM DH

Spectrum DH provides daily gut support while also acting as a defense mechanism for animals facing digestive health challenges.

BENEFITS OF SPECTRUM DH

Maximizes Rumen Health and Function

- Elevates intake consistency
- Normalizes gut microflora and manure consistency
- Maintains rumen pH

Improves fiber digestion and feed efficiency

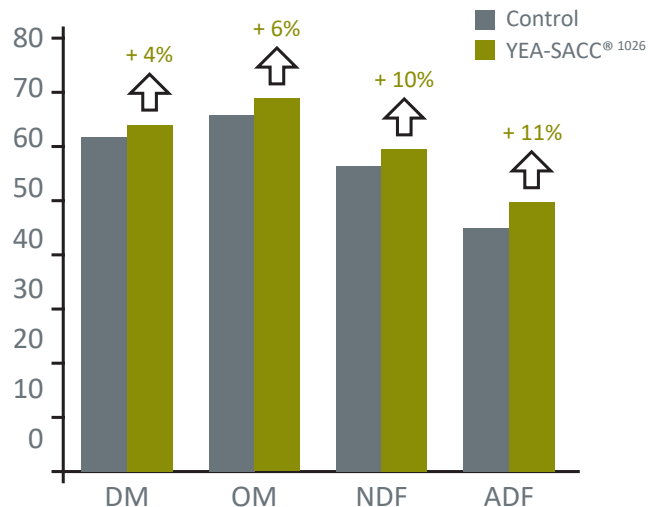

- Increases digestion of fiber, ADF, and NDF
- Maximizes the utilization of on-farm forages
- Improves feed cost per hundred weight of milk

Maintains digestive health in the face of challenges and stressors

- Molds, mycotoxins, and wild yeast exposure
- Environmental swings
- High intake and production
- Close-up and transition periods

Effects of Spectrum DH

Persistent Challenges: TMR Hygiene Summary

Contaminant	2019	2018	2017
Enterobacteria, cfu/gm	1,300	4,000	120
Mold Count, cfu/gm	20,000	20,000	10,000
Vomitoxin, ppm	1.10	0.60	1.40
Wild Yeast Count, cfu/gm	1,200,000	900,000	600,000

This TMR Hygiene analysis summary utilizes an average of 668 TMR samples per year per per contaminant and has been provided by Rock River Labs, Watertown, WI.

Spectrum DH: Insurance for Health – Production – Profitability

Feeding recommendations:

Lactating and non-lactating cows:
Maintenance: 15 g/h/d
Challenge: 30 g/h/d

Calves and growing/developing cattle:
5-10 g/h/d

Spectrum DH Utilizes Core Technologies

- Yea-Sacc® 1026 proven Live Yeast
- Prebiotics
- Probiotics
- Digestive Enzymes
- Antioxidants
- Total Microbial Count of 4.27×10^8 CFU/gm

#45823
