

water matters

2024 WATER TOURS | TUESDAY, SEPTEMBER 10 | MILWAUKEE & WEST BEND, WI

*Let's roll up our sleeves
and share solutions.*

Water is everyone's business.

Join us to learn how water is being managed in rural and urban locations.

*If you're in the business of using or
managing water you need to attend.*

MILWAUKEE METROPOLITAN SEWERAGE DISTRICT (MMSD)

- The MMSD cleans billions of gallons of wastewater, a combination of stormwater and sewage that enters the system every year. Daily, they can treat more than 630 million gallons of wastewater between the two plants.
- The Jones Island Water Reclamation Facility, operational since 1926 and designated a National Historic Civil Engineering Landmark in 1974, was one of the first facilities in the world to produce a fertilizer, sold under the name Milorganite®, as a byproduct of their water reclamation process.

RODEN ECHO VALLEY, LLC

- This family-run dairy farm operates about 2,800 acres of land and milks 850 cows just outside West Bend.
- Ever conscientious about water usage, the Rodens manage their land with waterways, grass buffer strips and no-till cover crops.
- Their milk production process includes using water twice — it's sent through a plate cooler to quickly drop the milk's temperature and then used either to wash down the milking parlor floor or as drinking water for their livestock.

PRE-REGISTRATION REQUIRED

Call 800-947-7379, scan the QR code or visit www.pdpw.org.

All attendees will meet at the bus pick-up site for travel to locations. Travel time will feature discussions with water-quality experts, researchers and others.

Tickets are \$49 per person; bus travel, refreshments and lunch included.

Wear comfortable closed-toe shoes and dress according to local weather.

*Up to 3.5 CE's are
available from DACE*
