FARM TECHNOLOGY TOURS

PAgEL
FAMILY BUSINESSES
EST. 1946

Tuesday, August 19 | 1 - 3 pm

Dairy Dreams

E3576 Cardinal Road, Casco, Wis.

AQUA SYSTEM

- Concentrates the dairy's nutrients and separates them into separate pits, allowing for more specific nutrient application
- Allows for reusing water for sprinklers and flush tanks; reduced well-water use
- Reduces hauling costs; keeps trucks off the road
- Offers potential for another revenue stream

TOUR SPONSOR

Wednesday, August 20 | 1 - 3 pm

Endres Berryridge Farms

6953 Hyer Road, Waunakee, Wis.

DIVERSIFIED COMPOSTING MANURE SYSTEMS

- Composting separated solids from liquid manure into high-quality bedding for lactating cows while maintaining high milk quality
- Edge-of-field composting of bedding-pack manure from the farm
- Value-added mixes of compost and other soil amendments help improve soil health and save costs on crop production
- Compost spreader uniformly spreads compost and other materials across farm fields

MARKEŠAN, WI

Thursday, August 21 | 10 am - 12 pm

Double S Dairy

N3447 Marshview Rd, Markesan, Wis.

RAIN 360

- Delivering bands of the supplied liquid directly to the base of the plant
- Reduces cost of crop irrigation and the application of manure, leachate and fertilizer
- Has provided a 90% savings in manure-application cost and \$50,000 a year for leachate application compared to custom application
