

feed management, storage and tracking **DAIRY TOURS**

Second-Look Holsteins, Eden, Wis.

Yes! A forage diet of only corn silage and Western dry hay can be successful.

- FeedWatch® tracks feed inventory as well as dry matter and ration changes.
- Pile densities, face temperatures and Feed-watch® accuracy reports are monitored and communicated with employees to produce a quality feed product.
- Feed pad collects 100% of runoff.

Are you wondering how to blend the best possible ration after a tough growing season?

Do you know your cost of production?

See how two Wisconsin dairies manage their feed storage and environmental compliances while optimizing forage quality, data tracking and more.

Engage in an over-the-lunch discussion with consultants and farm hosts.

Thursday, October 24, 2019

Contact PDPW today to reserve your seat.

Registration: \$79 members; \$200 non members

Vir-Clar Farms, Fond du Lac, Wis.

See the innovative feed system tailor-made for their dairy.

- TMR Tracker™ allows them to manage feed inventory and monitor feed costs.
- A Programmable Logic Controller (PLC) in the feed kitchen controls bin ingredients and mixing commands; data is automatically relayed from the stationary mixer to the feed truck for delivery; delivery verification follows.
- Collected leachate is first sent to the digesters and then to the lagoon.
