CE continuing veterinary medical education hours will be awarded to veterinary professionals who attend the program in its entirety. Courses run in partnership with the University of Wisconsin School of Veterinary Medicine (UW-SVM). The UW-SVM is an accredited continuing veterinary medical education provider; however, participants should be aware that some boards have limitations on the number of hours accepted in certain categories and/or restrictions on certain methods of delivery.

- 8:30 Workshop begins
- 9:00 Tour and discussion at American Foods Group
- 12:00 pm Lunch
- 12:30 General sessions
- 3:45 Workshop concludes

Workshop Experts

Dr. Don Höglund, DVM, is co-author for 2015 Elsevier Textbook publishers "Efficient Livestock Handling: Practical Application of Animal Behavior and Welfare Science". Dr. Höglund has presented more than 1,400 professional and farmer seminars and workshops on safe and efficient human and agriculture animal interaction, health care, and workforce learning in USA, Canada, and the European Union. He is an active lecturer, trainer, and leader of workshops internationally, teaching Dairy Applied Behavior classes several times annually for the University of Pennsylvania – School of Veterinary Medicine.

Dr. Kurt Vogel, PhD, is an Associate Professor of Livestock Welfare and Behavior at the University of Wisconsin - River Falls. Dr. Vogel's research and teaching interests include the effects of management practices on livestock physiology and behavior from farm to slaughter. He completed his B.S. and M.S. degrees in Animal Science at the University of Wisconsin-Madison and received his doctoral training in Animal Sciences at Colorado State University under the guidance of Dr. Temple Grandin. During this time, he performed multiple studies regarding the impact of feed additives on feedlot cattle physiology and behavior; electrical stunning of pigs, and dairy animal welfare assessments. Dr. Vogel is president of Vogel Livestock Solutions, a consulting company that focuses on practical and applied implementation of animal housing, handling, management, and slaughter processes.

American Foods Group Tour - completing the picture

This guided tour of American Foods Group may forever change the way you view your cull cows and culling decisions. See for yourself cull-cow quality as you trace backwards from the cooler to the harvest floor. Hear from beef buyers, market experts, and USDA meat inspectors about carcass conditions, body condition and condemned cows.

We must learn from - and continue to improve - human and animal interaction

The way we handle and work around our animals matters to consumers. **Don Höglund, DVM**, will share what he knows about how animals learn and how we need to train ourselves about handling, housing and habits that will help when working with our herds.

Survey says?

Learn how U.S. dairy stacks up with the rest of the world

Join **Dr. Kurt Vogel** as we explore the relationships between cull-cow quality, animal welfare, and carcass value. How does the United States measure up to the rest of the world? Review some of the results and highlights from a large multinational survey conducted in conjunction with a major food-service company to understand the differences in cull-cow quality and welfare challenges in countries around the world. In addition, Dr. Vogel will highlight when euthanasia is appropriate and outline the proper methods to perform it with the welfare of people and animals in mind.
