**YOUR FUTURE SUCCESS** hinges on how you interact and work with others. Employers are looking for leaders with strong social and communication skills, emotional intelligence and an ability to collaborate with different personalities.

At Stride™ you'll participate in a whirlwind of team challenges and activities that bring out the leader in you. You'll learn important techniques that distinguish you from the rest.

***You won't leave  
the way you came.***

**A JOURNEY OF A THOUSAND MILES** begins with a single step, but you won't get there if you don't know where to start. Effective communication is where it begins, and it involves more than talking. Intentional listening and seeking to understand people are fundamental techniques you'll practice. And then you'll kick it up a notch by learning how to clearly articulate your thoughts, persuasively engage others, and read their body language.

### **UNLOCK YOUR FUTURE: CAREER DISCOVERY**

The world needs your talent. Whether you know the career you'd like to pursue or you haven't got a clue, the tours, hands-on workshops and other activities at Stride will get your wheels spinning. A mini career fair will introduce you to a variety of new technologies and career options that you may not have considered. You'll have the opportunity to talk with – and ask questions of – people currently working in various fields. Take a look at careers in finance, medicine, food, marketing, precision-data, regulation, and more.

### **GREAT TEAMS ACHIEVE GREAT DREAMS**

The things you can accomplish by yourself will never be greater than what you can achieve by working with others. Prepare to have fun in a series of fast-paced (*and sometimes hilarious*) group activities. You'll be amazed at how much more productive you are when you partner with others.

### **YES YOU CAN**

Your preconceived notions about the limitations you face are going to be tested when you meet our final guest. He grew up in a tough, dangerous neighborhood and served hard time after making a decision that forever altered his life. While still in prison, he determined to use his failure and adversity as a launching pad to teach others how to make right choices.
